HIGHLIGHTS

Boomerang Kaolin Prospect, Southern Cross

- RC Drilling Discovers +42m Vertical Thickness High Quality Kaolin Clays near surface;
- Drillhole 21BMRC001 intersected 10m @ 7% Halloysite from 40m depth downhole (8.8m true thickness) within an intersection of 55m of kaolin downhole;

Brunswick Cu – Ni – PGE, Au Li Project

- Results from Company samples up to 7g/t gold and historic BP Minerals/West Coast Holdings Ltd percussion drilling of up to 15m@ 9.92g/t gold from 61m, confirm the gold potential of the wider Brunswick Project;

Airfield Gold Project

- RC drilling discovers large areas of previously unmapped nor recognised amphibolite/BIF (greenstone) belts in the Marvel Loch Airfield Gold Project.

Kula Gold Limited (“Company”) (ASX:KGD) is pleased to update exploration activities for the quarter ended 30 September 2021.

Southern Cross Region (KGD 100%)

The Company reported a major technical breakthrough in the Company’s highly prospective Southern Cross Gold project. RC drilling discovered large areas of previously unmapped nor recognised amphibolite/BIF (greenstone) belts in the Airfield Gold Project. The Company recognised a geophysical signature associated with the results and has identified numerous repeats of similar greenstone prospects in the region, so Kula has applied for new applications adding to Airfield covering 570km².

The Company completed RC drilling at the Airfield Project near Southern Cross WA intersected thick >42m vertical kaolin clay development over the 300m drilled length at the newly named Boomerang Kaolin Prospect. The holes were drilled to test a magnetic anomaly and intersected the deep white kaolin zone. The results have been received and are shown in Table 1.

21BMRC001	40	50	10	8.8	7	89	96

The 10m @7% Halloysite (downhole) was confirmed by SEM imaging analysis by CSIRO (Adelaide). The report noted “good particle separation and spread” for the Kaolinite/Halloysite.

An RC drill program is planned in November on the Boomerang Kaolin prospect which will define the kaolin resource and test gold targets beneath the kaolin zone. This program will be followed by diamond drilling for metallurgical test work.

Brunswick Cu – Ni – PGE, Au Li Project (KGD 100%)

During the quarter a total of 8 rock chips were collected from spoil around the Hunters JV headframe and at nearby Mt Cara to the Northwest.

Geochemical sampling at the Brunswick project is ongoing and material results will be released once analysed and interpreted.

Southern Cross-Westonia (KGD 100%)

All Westonia project licenses have recently been granted, and key landowner access agreements have been put in place.

Geochemical sampling programs will commence once the relevant statutory approvals have been obtained.

Kula-Lake Rebecca Gold Project (KGD 100%)

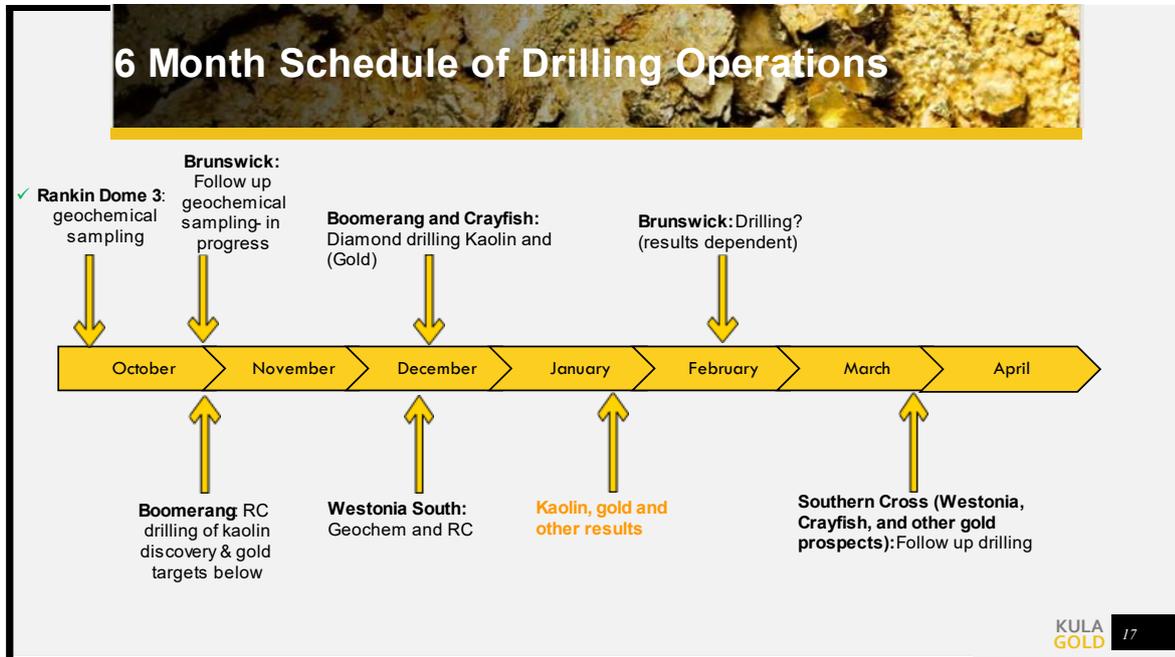

Figure 5. The Lake Rebecca project map - gold borders denote Kula Gold tenements

Newly interpreted greenstone traverses into Kula's ground as shown by the white dotted lines.

Recent activity in the area with the takeover announcements for Apollo Consolidated (ASX:AOP) by Ramelius Resources Ltd (ASX:RMS) and then by Gold Road Resources Ltd (ASX:GOR) demonstrate the emerging potential of this area. The Company has approved work programs in place for further work.

Upcoming Drilling

Corporate

During the quarter, the Company completed a placement of 36m shares to raise \$1.8m under its 7.1 and 7.1A share issuance capacity managed by Foster Stockbroking Pty Ltd.

Payments to directors and associated entities during the quarter totalled \$64,000.
